

NEW FIRMWARE FOR K-7: VERSION 1.10

Changes to V1.10: several interesting features have been added, which improve Movie mode and Live View function.

- * Added Movie Editing function on playback mode palette. Movies can be divided into multiple segments and unwanted segments can be erased. Please check enclosed pdf file.
- * When using Live View, Autofocus is activated by pressing shutter release button halfway, and autofocus speed has been improved.
- * Under Live View mode, added Electronic Level indication on the LCD monitor.
- * When M or X modes are selected and Electronic Level is on, both Exposure meter and Electronic Level are displayed in the LCD monitor and in the viewfinder.
- * Added Reversal Film mode in Custom Image function.
